Welcome

This screen starts the CKM upload process, which checks that all assets in **DAM/commitgraph** are:

1. Automatically uploaded into CKM if they have been changed,
2. Updated in other assets that have an updated asset embedded within.

The entire process can take a few minutes, and will take longer if there are a lot of assets.

As the process is working, a regularly updated status message will be displayed. At end of the process, a report will list the results.
